

EMPLOYMENT OPPORTUNITIES

Do you want to work with the best team?

GMV INSYEN is a German company, being part of GMV, a global technology group in Space, Defense, ICT and Intelligent Transport Systems employing 2000 staff. Our activities in Germany are related to high-tech aerospace projects, space operations, ground systems, mission analysis, navigation and flight dynamics.

JOB DESCRIPTION

If you are passionate about Software programming and you want to grow in a Defence and Security area in GMV, you're the one we are looking for!

GMV is now looking for a Software Developer 3D simulation system

You'll have the chance to work with a talented, young and international team, performing tasks related to Defence and Security.

This position will mainly consist in developing and maintaining various aspects of a turret 3D simulation/training system. It covers the complete software implementation of the training solution, starting from low level features and networking components to high level user interface design elements and using various state of the art technologies and frameworks. You will also have the opportunity to work on other space oriented projects involving complex and exciting scientific and physical backgrounds, such as atmospheric observations processing or meteorology predictions.

In this position you will be responsible for:

- Development and maintenance of a 3D simulation system
- Customer interaction to discuss requirements, recommend alternative implementations
- Customer support
- Configuration management of software deliveries
- Software installation and testing

REQUIREMENTS:

Academic degree: Degree in Software Engineering or similar

Level of English: Advanced

Experience: 3 – 5 years

Technical knowledge:

- Strong C++ (minimum version C++11)
- Experience with Nodejs
- Experience with Angularjs 2

Further experience requirements:

- Agile Development Methodology
- Unit testing
- Test driven design
- Continuous integration

If you would like to work in an interesting, fun, fast-paced, challenging, diverse and global company which is growing rapidly, please send us your resume to jobs@gmv.com
