

EMPLOYMENT OPPORTUNITIES

Do you want to work with the best team?

GMV INSYEN is a German company, being part of GMV, a global technology group in Space, Defense, ICT and Intelligent Transport Systems employing 2000 staff. Our activities in Germany are related to high-tech aerospace projects, space operations, ground systems, mission analysis, navigation and flight dynamics.

JOB DESCRIPTION

If you believe that cybersecurity plays a very important role in an organization, just as we believe in GMV, you're the one we're looking for!

GMV is now looking for a Security engineer in Space

You'll have the chance to work with a talented, young and international team, performing tasks related to information security.

The selected candidate will develop activities in the field of cybersecurity for large space missions by preparing and performing computer forensics, responding to incidents, executing penetration tests and vulnerability assessments.

REQUIREMENTS:

Academic degree: Degree in Software Engineering or similar

Level of English: Advanced

Experience: 0 – 3 years

Experience in any of the following technologies is not mandatory but appreciated:

- Computer Forensics
- Information Security

Further experience requirements:

- Computer Forensics
- Ethical Hacking

If you would like to work in an interesting, fun, fast-paced, challenging, diverse and global company which is growing rapidly, please send us your resume to jobs@gmv.com
