Situation in Germany

DLR Space Administration

Tasks are the result of the Raumfahrtaufgabenübertragungsgesetz (RAÜG):

- To shape Germany`s space commitment and represent its interests internationally, particularly with regard to ESA
- To develop the German space strategy on behalf of the Federal Government
 - To define the priorities, to develop the programme
 - definition (declaration) and implementation
 - approval (support letter)
 - Supervision of its implementation (obligation to report the ministry!)

ARTES 20 IAP – German key aspects

**commercial sustainable
service**

The commercial provider in the future has the lead of the project from the beginning

The he service is of interest to a diverse user group

Thank you for your attention!
