

S3P Space

– collaboration is key

The aim for S3P Space is to enhance and promote collaboration between Space actors in Europe to strengthen the value chain Access to Space (including launching facilities).

S3P Space is a network connecting Space regions in the EU. Smart specialisation platforms (S3P) are initiated by the European Commission with the purpose of strengthening European value chains in important areas.

We welcome all space actors (universities, companies, research institutes etc.) to a digital meeting to learn about S3P Space and how it can help your organisation connecting with other Space regions.

Date: 7 June, 2022

Time: 13:00-15:00 (GTM +2)
