

## Technical Director

esc Aerospace is an agile, product neutral systems integrator with the depth of experience of a larger corporation and offices in Munich, Prague, and Orlando. Our size, low overhead, extensive solutions partnerships and global reach enable us to meet the highest complexity technological challenges and meet our clients' needs with best value solutions. Our lines of business include Mission Critical Systems, Security and Unmanned Systems.

We are looking for a Technical Director to support our highly dynamic team in **Munich**, Germany.

Skills we would like to see in candidates are:

- Strong **satellite system engineering** background
  - Strong **satellite communication and navigation** background
  - Proven achievements in subcontractor management and negotiation skills
  - Strong proposal and review data package writing skills for customers like ESA, DLR or big industry corporations
  - Proven achievements in **leading a technical team**, preferably with international members
  - Self-motivated, works independently, stress tolerant
  - Willingness to travel frequently, including travel abroad, feels comfortable to work in an international environment
  - Ability to present our company professionally
  - Experience with **unmanned aerial systems** (UAS, UAV, RPAS, drones)
  - Software architecture and development, AGILE methods, information and cyber security
  - Electronic hardware development background
  - Additional asset: Drone pilot.
- 
- Degree: Aerospace Engineering, Information Technology, Physics or similar (master or higher)
  - Language skills: **German**, English business fluent
  - Nationality: **European Union**, must be able to obtain security clearances in Germany
